

## Wade Brooks HVAC Manager

As the HVAC Manager for Welsh Construction, Wade Brooks specializes in the maintenance and installation of HVAC components including roof top heating and cooling units, boilers, and pumps. Wade's responsibilities include estimating, bidding, securing, and managing all departmental projects. He supervises and coordinates all HVAC functions to ensure the profitable and successful completion of the work. Under Wade's leadership, the HVAC department has consistently met or exceeded budgetary goals.

As the department head, Wade developed the company's safety policies and regulations. In addition to overseeing the enforcement and implementation of internal safety procedures, Wade is responsible for securing permits and ensuring code compliance.

A man of his word, Wade has earned the respect of his clients and peers through hard work, exceptional follow through, and a commitment to quality. As the spokesperson for the department, Wade cultivates lasting relationships with clients, subcontractors, vendors, and other construction professionals.

Wade has more than 27 years of experience working in the construction industry including positions in building maintenance and machine shops. Wade's experience includes working on robotic CNC machines and on diesel, gas, LP, and electrical vehicles.
