

# Abe Hofmeister Senior Project Manager, LEED® AP

As a Senior Project Manager for Welsh Construction, Abe Hofmeister estimates and manages multi-family and retail construction projects for the company. His responsibilities include overseeing every phase of the construction project and coordinating communication among all parties involved in the building process to deliver the project on time and on budget.

A seasoned professional with more than ten years of industry experience, Abe worked for both The Rottlund Company and JE Dunn Construction Company before joining Welsh. His portfolio of completed projects include work for high profile retailers Best Buy and Target, as well as senior and multi-unit housing developments, movie theatres, and religious projects.

Abe’s well-rounded construction experience and ability to visualize a project, foresee pitfalls and work proactively to avoid them makes him a valuable asset to any new construction project. In addition, Abe has achieved the LEED® Accredited Professional certification from the U.S. Green Building Council, giving him valuable insight for developers who want to implement “green” processes and materials into their projects.
