

Bruce Kuchinka Plumbing Manager

Since joining Welsh in 1991, Bruce has been an integral part of the development and growth of the plumbing department. Bruce started the Plumbing department as a service-only department and has since developed it into a profitable service and contracting division. As Plumbing Manager, Bruce oversees operations and personnel assigned to the plumbing and HVAC departments. He also oversees business procedures and day to day operations including project management, supervision of staff, inventory control, scheduling, staffing, and safety. Bruce's 25 years of experience and strength in customer relations has been an intricate part of his success.

A licensed Master Plumber, Bruce began his career as a laborer/plumber with Project Plumbing Co in 1981, a company he later purchased and directed for five years. He helped organize and implement an "Aware" safety program for the company and continues to build on that campaign with the staff he oversees.
