

Aaron Vorasane CAD Technician, Genesis Architecture

As a CAD Technician for Genesis Architecture, Aaron Vorasane creates computer generated drawings for all phases of design, including as-built verification, design, and construction documents. Aaron has been involved with a number of Tenant Improvement projects, handling everything from pricing plans to CDs and As-Builts. He has also assisted with the design of a number of luxury apartment and villas in Florida.

Since joining Genesis Architecture in April 2006, Aaron has demonstrated exceptional technical abilities working with CAD software and has become a resource of technical expertise and support for his colleagues. He is often called upon to help resolve CAD issues. Aaron also serves on our internal CAD Standards Committee which is charged with updating and maintaining our company CAD standards.

A focused individual with an exceptional work ethic, Aaron can be relied on to do whatever is necessary to meet client expectations and get the job done.
