David Malinowski Project Manager

With nearly 20 years of experience in the construction industry, David Malinowski has the expertise needed to consistently deliver high quality results. Before joining Welsh in 2000, David owned and operated Custom Restoration, where he provided remodeling consulting solutions, as well as finish carpentry services to homeowners throughout the Twin Cities metro area. In addition, David was a Project Manager for Protouch Painting and prior to that, spent three years as a GRI-designated realtor. His broad industry background gives him the knowledge required to successfully complete his projects on time and within budget.

At Welsh, David currently specializes in tenant improvement projects, and while working closely with building owners and property managers, he has completed more than 250 projects during his tenure with Welsh. He has received numerous internal awards for exceptional customer service, project achievement and teamwork, and most importantly, because of his ability to create a project that serves his customer's needs, David is often rewarded with repeat business and recommendations from satisfied customers.
