

Steve Stecker Division Manager and Senior Project Manager

With 18 years of experience in new building construction, Steve Stecker joined Welsh Construction in February 2003. His responsibilities include initiating, managing, and controlling all aspects of base building projects, including sales, bidding, estimating, project management, safety enforcement, and subcontractor and customer relationship management.

Steve's professional experience includes many large and complex projects located throughout the Midwest. In addition to leading design and construction activities, he has been an integral part of the site development team for many projects. His contributions include site evaluations, acquisitions, and working with city officials in the approval process.

Welsh Construction looks to Steve when estimating or bidding a project. Steve's ability to provide creative project solutions, develop efficient project plans and effectively communicate with members of a project team make him a successful leader. Because of these exemplary skills, Steve is able to foster long-term, mutually-beneficial relationships with project teams and owners.

Steve's professional responsibilities have included skilled labor, site supervision, estimating, project management, and business development. He has worked for several notable firms in the Midwest and brings a wealth of experience to every project.
