

Froehling Anderson

Superior Plaza
St. Louis Park, Minnesota

The 11,143 square foot Froehling Anderson premises occupy an entire floor of the Superior Plaza office building. A welcoming reception area was created for the suite through the use of elegant porcelain tile; a rich, vinyl wall covering; and custom frosted windows that integrate the company logo into their unique design. To maximize the utility and functionality of the space, a divisible training room with connecting staff lounge was created, and coffee bars were placed throughout the suite. Environmental responsibility was a high priority in this design, and numerous doors, framing and glazing were reused and relocated accordingly. The previous build-out featured a variety of ceiling heights which were thoughtfully integrated into the final design to take full advantage of the architectural distinctions of Superior Plaza.

Services Performed:

Space Planning
Construction Drawings
Interior Finish Selection

Project Features:

Full Floor Suite
Divisible training room with staff lounge
Coffee bars throughout suite
