

## Executive Park

North Corrington Avenue  
Kansas City, Missouri

The Office Warehouse complex at Executive Park evolved in response to manufacturing and shipping company demands for efficient, flexible and inexpensive facilities. These site-cast, tilt-up structures feature high bays and long spans for maximum capacity while minimizing construction cost and time. Each building may be subdivided easily, with service and dock facilities for all tenants. The colorful and durable exterior is a welcome addition to an otherwise drab industrial area. The Executive Park complex is one of many industrial buildings constructed across America by Genesis Architecture.
