

Urban Ventures

3016 4th Ave S
Minneapolis, Minnesota

As a newly renovated inner city building, the 'Urban Hub' youth center expresses its energetic playfulness through the use of its industrial looking building materials and finishes. The exposed natural use of materials, both on the exterior facades and interior spaces are designed to be colorful and inviting, yet express strength and stability to help promote a revitalized inner city landscape.

The 'Urban Hub' youth center provides a much needed gathering place for many inner city youth to gain the various life skills and learning tools needed to help them get ahead. The building contains a performing stage with theatrical lighting, a future recording studio, an indoor skateboard park, snack bar, computer lab, and numerous 'break out' rooms for the kids to meet and learn from each other.

Services Performed:

- Site Planning and Design
- Architectural Design
- Interior Design and Space Planning
